

Anabel Sieber

Email: villalobos1998@gmail.com | Phone: 760-881-2253 | Location: Orange, CA

GitHub: <https://github.com/annvilla1998>

LinkedIn: <https://www.linkedin.com/in/anabelsieber/>

Portfolio: <https://anabelvillalobos.com/>

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, HTML, CSS, C++, C, SQL

Frontend: React, Redux, Next.js, Angular, React Native, Tailwind CSS, Material UI, Zustand

Backend: Node.js, Express.js, Django, Flask, RESTful APIs, Prisma, SQLAlchemy, Sequelize

Cloud & DevOps: AWS, Azure, Docker, Linux, CI/CD, Git, GitHub, GitLab, Terraform, GitHub Actions

Databases: PostgreSQL, MongoDB, SQLite, Firebase, MySQL

Tools & Testing: Jest, Playwright, Postman, Storybook, Webpack, Stripe, Auth0

Specialized: AI/LLM Integration, Accessibility (WCAG)

Experience

V.TWO | *Software Engineer* | Remote | September 2025 – Present

- Architected full-stack solutions across client projects, delivering performance optimizations and scalable features tailored to each client's needs.
- Implemented caching strategies and async patterns to improve application responsiveness and reduce API latency.
- Built and maintained CI/CD pipelines with GitHub Actions, automating testing and deployment across multiple client environments and eliminating manual release errors.
- Provisioned scalable cloud infrastructure on Azure using Terraform, enabling version-controlled, repeatable environments across client applications.

SOMOS | *Software Developer Intern* | Remote | June 2025 – August 2025

- Built an authenticated MCP server enabling LLMs to securely access and analyze enterprise product data.
- Deployed serverless AWS/Express.js infrastructure supporting real-time communication between AI systems and enterprise APIs.

V.TWO | *Contract Software Engineer* | Remote | February 2025 – June 2025

- Built a modular React/Redux/FluentUI frontend for an AI-powered legal SaaS platform, integrating with .NET APIs and PostgreSQL/Azure Blob Storage for real-time vector-embedded document access.
- Drove frontend architecture decisions that standardized performance-efficient component patterns, including lazy loading, code splitting, and memoization across multiple product features.

CISCO MERAKI | *Full-Stack Software Engineering Intern* | Remote | September 2023 – July 2024

- Developed reusable React components for Cisco's Magnetic design system, serving 30K+ Dashboard users across multiple internal teams.
- Built an npx CLI templating tool that reduced page-generation time by about 70%.
- Implemented light/dark/color-blind theming across components, improving accessibility for 30K+ users.

Education

GEORGIA INSTITUTE OF TECHNOLOGY | August 2025 - August 2027

Master of Science, Computer Science | Remote

SOUTHERN NEW HAMPSHIRE UNIVERSITY | October 2022 - August 2025

Bachelor of Science, Computer Science | Remote | GPA: 3.8/4.0

APP ACADEMY | August 2021 - May 2022

Software Engineer Certificate, Full-Stack Web Development | Remote
